What is **Viafirma** Manager?

Viafirma Manager is an optional add-on for Viafirma Platform, which allows the administration, configuration and customization of the platform visually through an intuitive and easy-used control panel.

It can extract detailed and analytical information about the operation of the electronic signature platform thanks to its statistics panel, which includes information such as operating systems (desktop or mobile) that users access from, browsers, devices, certification authorities...also allowing filters by date, applications and more.

Features

- ▶ **Full control** over the behavior of applications that interact with the platform:
 - **General Options** applications.
 - Configuring the storage system used by the application.
 - **Create, edit and query** the contact information.
 - **Backups** of settings.
 - Setting the **TSA** (or timestamping time stamp).
 - **Control of the Certification Authorities** supported or active and validation processes.
- ▶ Control of **custody certificates** for signing operations on server.
- Statistical data** on the use of the platform as defined variables:
 - Date ranges.
 - Operating System.
 - Agent (browser).
 - Region (Local).
 - Application.
 - Certification Authorities (CA's).
- ▶ **Viewing statistics** on sectoral and line diagrams.
- ▶ Data **viewing tables** with access to the advanced search.
- ▶ **Filters** customizable advanced searching (by type of operation, operational criteria, value, range). Administration panel with options such as:
 - **Management** options for combos.
 - CA's **management** globally to add new types of certificates.
 - Managing **users and roles** with edit permissions.

Objectives

-  Make the **operation and configuration** of the platform easier, removing all the complexities associated with the control of it.
-  Provide **analytical information** about the behavior of electronic signatures applications users.
-  **Display of statistics**, offering all services in a visually and easily configurable way.
-  **Centralization of data from** different applications that make use of the platform.
-  Allow **analysis** of efficiency and performance of the platform.
-  Get **detailed information** of operations through customized searches.

User Benefit

- ▶ **Configure** each application independently.
- ▶ **End user viewed** of the application specific data.
- ▶ **Greater efficiency** through better internal management use of the platform.
- ▶ **Management** of statistical data.
- ▶ **Enabling** or temporary disabling of applications.
- ▶ **Simple** and **easy** to use.
- ▶ **Full system** audit.
- ▶ **Continuous** evolutionary developments
